Subject Index to Volume XXXIII

Abdominal ganglion
  of *Aplysia*, electrophysiology and interconnections of bag cells in, 865–876
  of *Aplysia*, stimulation of egg laying by extracts of bag cells of, 877–881
Abducens nucleus
  neuronal firing patterns in relation to horizontal eye movements in alert monkeys, 383–392
Adrenergic nerves
  blocking effect of adrenergic reinnervation on fibrillation of denervated striated muscle, 882–890
Amygdaloid nucleus
  amplitudes of background fast activity in, 148–159
    correlation with cell size, 160–171

Barbiturates
  effect on evoked sustained focal potentials of cells of spinal cord, 562–582
Brain
  amplitudes of background fast activity at particular brain sites in cats, 148–159
  auditory responses in goldfish, electrophysiological study, 116–128

Carotid body
  chemosensory nerve endings in, depolarization of, 685–696
Caudate nucleus
  amplitudes of background fast activity in, 148–159
    correlation with cell size, 160–171
Cerebellar cortex
  long-latency response after stimulation of dorsal spinocerebellar tract and external cuneate nucleus, 308–320
  Purkinje cell output and input in relation to maintained postures and prompt movements in monkeys, 537–547
  Purkinje cell responses to convergent inputs from cerebral cortex and peripheral sensory systems in cats, 697–712
Cerebellum
  nuclear neuron discharge related to maintained postures and prompt movements in monkeys, 527–536
  stimulation and recording of responses in inferior olivary nucleus of cat, 199–209
Cerebral cortex
  association cortex, firing of neuron pairs during sleep and wakefulness in cats, 672–684
  auditory cortex of cat, columnar organization and organization according to depth, 172–187
  auditory cortex of cat, tonotopic organization, 188–197
  coronal-precruciate cortex, gross potential activity in during conditioned eye blink reflex in cat, 838–850
  coronal-precruciate cortex, unit activity in during conditioned eye blink reflex in cat, 851–864
  corticofugal influence on activity of lateral geniculate neurons in cats, 459–474
  neocortical neurons, excitability changes in cats during seizures induced by topical penicillin, 73–85
  responses of cat cerebellar Purkinje cells to inputs from, 697–712
  stimulation and recording of responses in inferior olivary nucleus of cat, 199–209
  visual areas I and II in hedgehog, relation between evoked potential maps and architectonic subdivisions, 595–615
  visual cortex evoked response in cats, operant validation in behavioral coding of, 548–561
  visual cortex in cat, localization of visual patterns by neurons, 812–826
Chemoreceptors
  chemosensory nerve endings in cat carotid body, depolarization of, 685–696
Chorda tympani nerve
  discharges in response to chemical stimulation of tongue in rats, 768–783
Cochlear nucleus
  binaural interaction and contralateral inhibition in, study in chinchilla, 108–115
  intracellular recordings during tone stimulation in cats, 137–147
  ventral, neuronal response to low-frequency tones in kangaroo rat, 351–364
Cold
  receptors in nasal area of cats, static properties of, 271–275
Conditioning
  conditioned eye blink reflex, participation of coronal-precruciate cortex in, 838–850
  conditioned eye blink reflex, unit activity at coronal-precruciate cortex of cat during, 851–864
  operant validation of bioelectric coding of visual cortex evoked response in cats, 548–561
Convulsions
  induced by topical penicillin in cats, excitability changes and inhibitory mechanisms in neocortical neurons, 73–85
Cuneate nucleus
  stimulation inducing long-latency responses in cerebellar cortex, 308–320
  widespread cutaneous inhibition in, 616–624

Denervation
  of striated muscle and reinnervation by adrenergic nerve, antifibrillary effect, 882–890
Diptera
  motoneurons of flight muscles of, organization, 86–95

Echinodermata
  cortical visual areas I and II in hedgehog, relation between evoked potential maps and architectonic subdivisions, 595–615

XUM

Egg laying
stimulation by extracts of bag cells of abdominal ganglion of *Aplysia*, 877–881
Electric organ
factors affecting voltage threshold in, 585–594
Electric potentials
evoked potential maps of cortical visual areas I and II in hedgehog, relation to architectonic subdivisions, 595–615
evoked potentials at coronal-precruciate cortex to conditioned eye blink in cats, 838–850
evoked sustained focal potentials and membrane potential of neurons and of unresponsive cells of spinal cord, 562–582
field potentials of olfactory bulb, analysis and topographical relation to lateral olfactory tract, 643–653
postsynaptic potentials in cat reticular and Deiters' neurons, origins of, 210–226
potential response of catfish retina, lateral mechanisms involved, 625–642
proximal negative response of frog retina, 405–420
unit activity at coronal-precruciate cortex of cats during conditioned eye blink, 851–864
visual cortex evoked potentials in cats, operant validation in behavioral coding of, 548–561
voltage threshold in excitable cells, influencing factors, 585–594
Electric stimulation
of vestibular nuclei of cats, comparison of responses with responses to tilting, 750–767
responses of goldfish optic tectum to, 36–45
Electroretinography
b-wave, relation to intracellular responses of Müller cells in *Necturus* retina, 323–341
comparison with proximal negative response of frog retina, 405–420
Epilepsy
seizures induced by topical penicillin in cats, excitability changes and inhibitory mechanisms in neocortical neurons in, 73–85
Extrapyramidal tracts
amplitudes of background fast activity in, 148–159
Eye movements
horizontal, firing patterns of abducens neurons in alert monkeys in relation to, 382–392
oculomotor single unit behavior in alert monkeys during, 393–404
Eyelids
conditioned eye blink reflex, participation of coronal-precruciate cortex in, 838–850
conditioned eye blink reflex, unit activity at coronal-precruciate cortex of cat during, 851–864

Face
thermal stimulation in squirrels, steady-state response of trigeminal ganglion neurons to, 508–517
thermal stimulation in squirrels, temperature change response of trigeminal ganglion neurons to, 518–526
Feedback
length and force feedback to soleus muscles, evaluation in decerebrate cats, 784–811
Fibrillation
of denervated striated muscle, blocking by reinnervation with adrenergic nerve, 882–890
Fish
auditory responses in goldfish brain, electrophysiological study, 116–128
catfish retina, receptive-field organization of, 625–642
goldfish optic tectum, electrical properties of, 36–45
visual-auditory unit responses in goldfish tegmentum, 129–136
Fornix
amplitudes of background fast activity in, 148–159
stimulation of, effects on intracellular responses of hippocampal neurons in awake monkeys, 96–107
Frogs
proximal negative response of retina of, 405–420

Geniculate bodies
amplitudes of background fast activity in, 148–159
correlation with cell size, 160–171
lateral nucleus in cat, corticofugal influence on activity of neurons in, 459–474
Globus pallidus
amplitudes of background fast activity in, 148–159

Habenula
amplitudes of background fast activity in, 148–159
Hearing
auditory cortex of cat, columnar organization and organization according to depth, 172–187
auditory cortex of cat, tonotopic organization, 188–197
binaural tonal stimulation in cats, responses of neurons in dorsal nucleus of lateral lemniscus to, 441–458
tonotopic organization and discharge characteristics of single neurons in nuclei of lateral lemniscus in cats, 421–440
Heat
thermal stimulation of oral-facial regions in squirrels, steady-state response of trigeminal ganglion neurons, 508–517
thermal stimulation of oral-facial regions in squirrels, temperature change response of trigeminal ganglion neurons, 518–526
Hippocampus
amplitudes of background fast activity in, 148–159
intracellular neuronal responses in awake monkeys to septal and olfactory stimulation, 96–107
Hormones
in extracts of neuroendocrine cells of abdominal ganglion of *Aplysia*, stimulation of egg laying by, 877–881

Infraorbital nerve
static discharge of cold fibers in, relation to nose temperature of cats, 271–275
Insects
hawkmoth, centripetal and centrifugal visual cells in medulla of optic lobe of, 239–256

Labyrinth
responses to electrical stimulation in cats, 750–767

Light
photic stimulation of goldfish retina, responses in optic tectum, 36–45
visual unit responses in goldfish tegmentum, 129–136
Limbic system
amplitudes of background fast activity in, 148–159

Medulla oblongata
acusticolateral area in goldfish, auditory unit responses in, 116–128
reticular neurons, different spinal monosynaptic pathways converging onto, 227–238
reticular neurons, origins of postsynaptic potentials in, 210–226
Mesencephalon
auditory responses in goldfish, electrophysiological study, 116–128
lateral lemniscus, responses of neurons in dorsal nucleus to binaural tonal stimulation in cats, 441–458
lateral lemniscus, tonotopic organization and discharge characteristics of single neurons in nuclei of, 421–440
tegmentum of goldfish, visual-auditory unit responses in, 129–136
Microscopy, electron
of Müller cells in *Necturus* retina, 323–341
of snake muscle spindles, 9–27
Models, neurologic
voltage threshold in excitable cells, influencing factors, 585–594
Mollusca
Aplysia, electrophysiology and interconnections of two symmetrical neurosecretory clusters in abdominal ganglion of, 865–876
Aplysia, stimulation of egg laying by extracts of bag cells of abdominal ganglion of, 877–881
Mouth
thermal stimulation in squirrels, steady-state response of trigeminal ganglion neurons to, 508–517
thermal stimulation in squirrels, temperature change response of trigeminal ganglion neurons to, 518–526
Movement
discharge of neurons in nuclei of cerebellum of monkeys in response to, 527–536
interactions between voluntary and postural mechanisms of human motor system, 365–381
Purkinje cell discharge in cerebellum of monkeys in relation to, 537–547
Muscles
denervated striated muscle reinnervated by adrenergic nerve, antifibrillary effect, 882–890
flight muscles of flies, organization of motoneurons of, 86–95
intrafusal muscle fiber contraction, responses of snake muscle spindles to, 1–8
intrafusal muscle fibers in snakes, electron microscopy of, 9–27
soleus muscles, evaluation of length and force feedback in decerebrate cats, 784–811
triceps surae, frequency analysis of stretch reflex in, 713–749
voluntary and postural mechanisms of human motor system, interactions between, 365–381

Neuromuscular spindles
accommodation in afferent nerve terminals in snake, 475–489
electron microscopic study in snakes, 9–27
importance of length feedback in decerebrate cats, 784–811
linear response of cat spindles to stimulation, quantitative description of, 59–72
primary endings of, analysis in study of stretch reflex in cats, 713–749
responses to stretch and intrafusal fiber contraction in snakes, 1–8
tonic and phasic types in snakes, responses of, 28–35
Neurons
alpha motoneurons of triceps surae muscles, analysis in study of stretch reflex in cats, 713–749
Deiters' neurons, origins of postsynaptic potentials in, 210–226
Deiters' neurons, responses to tilting in cats, 759–767
firing of neuron pairs in cat association cortex during sleep and wakefulness, 672–684
hippocampal neurons, intracellular responses in awake monkeys to septal and olfactory volleys, 96–107
neocortical neurons in seizures induced by topical penicillin in cats, excitability changes and inhibitory mechanisms, 73–85
of abducens nucleus, firing patterns in relation to horizontal eye movements in alert monkeys, 382–392
of cerebellum, discharge related to maintained postures and prompt movements in monkeys, 527–536
of cerebral cortex, localization of visual patterns by, 812–826
of chorda tympani nerve and nucleus tractus solitarius, responses to chemical stimulation of tongue in rats, 768–783
of dorsal cochlear nucleus of chinchilla, contralateral and binaural effects in, 108–115
of dorsal nucleus of lateral lemniscus, responses to binaural tonal stimulation in cats, 441–458
of flight muscles of Diptera, organization of, 86–95
of inferior olive nucleus, responses to spinal and cerebral inputs in cats, 199–209
of lateral geniculate nucleus of cats, corticofugal influence on activity of, 459–474
of nuclei of lateral lemniscus, tonotopic organization and discharge characterisitcs in cats, 421–440
of nucleus tractus solitarius of rat, synaptic processing of taste-quality information in, 490–507
of oculomotor nucleus, behavior during eye movements in alert monkeys, 393–404
of spinal cord, evoked sustained focal potentials of, 562–582
of trigeminal ganglion in squirrels, steady-state response to thermal stimulation of oral-facial regions, 508–517
of trigeminal ganglion in squirrels, temperature

XUM

change response to thermal stimulation of oral-facial regions, 518–526
of ventral cochlear nucleus of kangaroo rat, response diversity to low-frequency tones, 351–364
of ventral quadrant white matter of cat spinal cord, receptive field properties of, 827–837
of vestibular nuclei, responses to electrical stimulation and tilting in cats, 750–767
reticular, discrimination of different spinal monosynaptic pathways converging onto, 227–238
reticular, origins of postsynaptic potentials in, 210–226
retinal, intracellular responses to moving light spot in *Necturus*, 342–350
visual-auditory unit responses in goldfish tegmentum, 129–136
visual neurons in medulla of optic lobe of hawkmoth, 239–256
Neurosecretion
bag cells in abdominal ganglion of *Aplysia*, electrophysiology and interconnections of, 865–876
bag cells in abdominal ganglion of *Aplysia*, extracts stimulating egg laying, 877–881
Nose
cold receptors in nasal area of cats, static properties of, 271–275
Nucleus tractus solitarius
discharges in response to chemical stimulation of tongue in rats, 768–783
synaptic processing of taste-quality information in rats in, 490–507
Nucleus ventralis posterolateralis
amplitudes of background fast activity in, 148–159
correlation with cell size, 160–171

Oculomotor muscles
horizontal eye movements in alert monkeys, firing patterns of abducens neurons in relation to, 382–392
Oculomotor nerve
oculomotor single unit behavior during fixation and eye movements in alert monkeys, 393–404
Olfactory bulb
analysis of field potentials and topographical relation between bulb and lateral olfactory tract, 643–653
stimulation of, effects on intracellular responses of hippocampal neurons in awake monkeys, 96–107
Olivary nucleus, inferior
unitary multiple-spiked responses in cat, 199–209
Opossums
field potentials of olfactory bulb in, analysis and topographical relation to lateral olfactory tract, 643–653
Optic lobe
centripetal and centrifugal visual cells in medulla of optic lobe of hawkmoth, 239–256
Optic tectum
electrical properties of, in goldfish, 36–45

Penicillin
induction of seizures in cats, excitability changes and inhibitory mechanisms in neocortical neurons in, 73–85
Peripheral nerves
responses of cat cerebellar Purkinje cells to inputs from, 697–712
Picrotoxin
effect on evoked sustained focal potentials of cells of spinal cord, 562–582
Pons
reticular neurons, origins of postsynaptic potentials in, 210–226
Posture
discharge of neurons in nuclei of cerebellum of monkeys in relation to, 527–536
interactions between voluntary and postural mechanisms of human motor system, 365–381
Purkinje cell discharge in cerebellum of monkeys in relation to, 537–547
tilting, distribution of neural responses within vestibular nuclei to, 750–767
Purkinje cells
discharges related to maintained postures and prompt movements in monkeys, 537–547
in cat cerebellar cortex, responses to convergent inputs from cerebral cortex and peripheral sensory systems, 697–712

Ranvier's nodes
factors affecting voltage threshold in, 585–594
Receptors, neural
cold receptors in nasal area of cats, static properties of, 271–275
high-threshold mechanoreceptors, projections to spinal neurons in cats, 293–307
Red nucleus
amplitudes of background fast activity in, 148–159
Reflex
conditioned eye blink reflex, participation of coronal-precruciate cortex in, 838–850
conditioned eye blink reflex, unit activity at coronal-precruciate cortex of cat during, 851–864
Hoffmann reflex during voluntary movement in humans, 365–381
in evaluation of length and force feedback to soleus muscles of decerebrate cats, 784–811
spinobulbospinal reflex, inhibition by splanchnic nerve stimulation in cat, 46–58
stretch reflex, frequency analysis in triceps surae muscles of cat, 713–749
Renshaw cells
mediation of inhibition of activity in other Renshaw cells in cats, 257–270
Reticular formation
amplitudes of background fast activity in, 148–159
discrimination of different spinal monosynaptic pathways converging onto reticular neurons, 227–238
inhibitory and excitatory pathways converging onto cat reticular neurons, 210–226
Retina
deformations and thickness variations accompanying spreading depression in, 891–900
ganglion cells in cats, transfer characteristics of excitation and inhibition in, 276–284
Müller cells in *Necturus*, intracellular responses

and relation to b-wave of electroretinogram, 323–341
photic stimulation in goldfish, responses in optic tectum, 36–45
proximal negative response in frogs, 405–420
receptive-field organization of catfish retina, lateral transmission systems functioning in, 625–642
response to moving spots, intracellular recording in *Necturus*, 342–350
sensitivity distribution and spatial summation within receptive-field center of, 654–671
transfer characteristics of excitation and inhibition in human visual system, 285–292

Salamanders
Necturus, intracellular responses of Müller cells of retina and relation to b-wave of electroretinogram in, 323–341
Necturus, intracellular responses of retinal cells to moving light spot, 342–350
Septum pellucidum
stimulation of, effects on intracellular responses of hippocampal neurons in awake monkeys, 96–107
Skin
high-threshold mechanoreceptors in cats, projections to spinal neurons of dorsal horn, 293–307
widespread cutaneous inhibition in dorsal column nuclei, 616–624
Sleep
firing of neuron pairs in cat association cortex during, 672–684
Snakes
muscle spindles of, accommodation in afferent nerve terminals, 475–489
muscle spindles of, electron microscopic study, 9–27
muscle spindles of, responses of tonic and phasic types of spindles, 28–35
muscle spindles of, responses to stretch and to intrafusal fiber contraction, 1–8
Sound
auditory unit responses in acusticolateral area of medulla and torus semicircularis of goldfish, 116–128
auditory unit responses in goldfish tegmentum, 129–136
binaural tonal stimulation, responses of neurons in dorsal nucleus of lateral lemniscus of cats to, 441–458
columnar organization of responses of cat primary auditory cortex to, 172–187
low-frequency tones, response diversity of neurons in ventral cochlear nucleus of kangaroo rat to, 351–364
tone stimulation of cat cochlear nucleus, intracellular recordings of responses, 137–147
tonotopic organization and discharge characteristics of single neurons in nuclei of lateral lemniscus in cats, 421–440
tonotopic organization of responses of cat primary auditory cortex to, 188–197
Spinal cord
different spinal monosynaptic pathways converging onto reticular neurons, discrimination of, 227–238
dorsal column nuclei, widespread cutaneous inhibition in, 616–624
dorsal spinocerebellar tract, stimulation inducing long-latency responses in cerebellar cortex, 308–320
evoked sustained focal potentials and membrane potential of neurons and unresponsive cells of, 562–582
interactions between voluntary and postural mechanisms of human motor system, 365–381
lumbar cord of cat, viscerosomatic interactions in, 46–58
projections of high-threshold mechanoreceptors to dorsal horn neurons, 293–307
Renshaw cells, inhibition by activity in other Renshaw cells in cats, 257–270
stimulation and recording of responses in inferior olivary nucleus of cat, 199–209
ventral quadrant white matter, somatic and visceral receptive field properties of fibers in, 827–837
Splanchnic nerve
viscerosomatic interactions in lumbar spinal cord of cat, 46–58
Stretch
reflex, frequency analysis in triceps surae muscles of cat, 713–749
response of tonic and phasic muscle spindles in snakes to, 28–35
responses of cat muscle spindles, quantitative description, 59–72
responses of snake muscle spindles to, 1–8
Substantia nigra
amplitudes of background fast activity in, 148–159

Taste
gustatory intensity and quality, neural correlates of, 768–783
taste-quality information, synaptic processing in nucleus tractus solitarius of rat, 490–507
Tendons
Golgi tendon organs, dynamic properties in study of stretch reflex in cats, 713–749
Golgi tendon organs, importance in regulation of muscle contraction in decerebrate cats, 784–811
Tissue extracts
of bag cells of abdominal ganglion of *Aplysia*, stimulation of egg laying, 877–881
Tongue
chemical stimulation inducing discharges in chorda tympani nerve and in nucleus tractus solitarius in rats, 768–783
Torus semicircularis
auditory unit responses in goldfish, 116–128
Trigeminal ganglion
neuronal responses to temperature changes during thermal stimulation of oral-facial regions in squirrels, 518–526
neuronal steady-state response to thermal stimulation of oral-facial regions in squirrels, 508–517

XUM

Vestibular nuclei
distribution of responses to tilting in cats, 750–767
Vision
centripetal and centrifugal visual cells in medulla of hawkmoth optic lobe, 239–256
cortical visual areas I and II in hedgehog, relation between evoked potential maps and architectonic subdivisions, 595–615
localization of visual patterns by neurons in cerebral cortex of cat, 812–826
visual cortex evoked response in cats, operant validation in behavioral coding of, 548–561

Wakefulness
firing of neuron pairs in cat association cortex during, 672–684

CONTENTS OF VOLUME XXXIII

NO. 1. JANUARY 1970

Responses of snake muscle spindles to stretch and intrafusal muscle fiber contraction. HUNT, C. C. AND R. M. WYLIE. 1
Structure of snake muscle spindles. FUKAMI, Y. AND C. C. HUNT. 9
Tonic and phasic muscle spindles in snake. FUKAMI, Y. 28
Electrical properties of goldfish optic tectum. SUTTERLIN, A. M. AND C. L. PROSSER. 36
Viscerosomatic interactions in lumbar spinal cord of the cat. HANCOCK, M. B., W. D. WILLIS, AND F. HARRISON. 46
Quantitative description of linear behavior of mammalian muscle spindles. POPPELE, R. E. AND R. J. BOWMAN. 59
Excitability changes and inhibitory mechanisms in neocortical neurons during seizures. AYALA, G. F., H. MATSUMOTO, AND R. J. GUMNIT. 73
Organization of flight motoneurons of diptera. MULLONEY, B. 86
Differential effects of septal and olfactory volleys on intracellular responses of hippocampal neurons in awake, sitting monkeys. YOKOTA, T., A. G. REEVES, AND P. D. MACLEAN. .. 96
Binaural interaction and contralateral inhibition in dorsal cochlear nucleus of the chinchilla. MAST, T. E. 108
Electrophysiological study of auditory responses in the goldfish brain. PAGE, C. H. 116
Visual-auditory unit responses in the goldfish tegmentum. PAGE, C. H. AND A. M. SUTTERLIN. 129
Intracellular recordings from cat cochlear nucleus during tone stimulation. STARR, A. AND R. BRITT. 137
Amplitudes of background fast activity characteristic of specific brain sites. BUCHWALD, J. S. AND F. S. GROVER. 148
Correlation of cell size with amplitude of background fast activity in specific brain nuclei. GROVER, F. S. AND J. S. BUCHWALD. 160
Functional architecture in cat primary auditory cortex: columnar organization and organization according to depth. ABELES, M. AND M. H. GOLDSTEIN, JR. 172
Functional architecture in cat primary auditory cortex: tonotopic organization. GOLDSTEIN, M. H., JR., M. ABELES, R. L. DALY, AND J. MCINTOSH. 188

NO. 2. MARCH 1970

Unitary multiple-spiked responses in cat inferior olive nucleus. CRILL, W. E. 199
Long inhibitory and excitatory pathways converging onto cat reticular and Deiters' neurons and their relevance to reticulofugal axons. ITO, M., M. UDO, AND N. MANO. .. 210
Discrimination of different spinal monosynaptic pathways converging onto reticular neurons. UDO, M. AND N. MANO. 227
Centripetal and centrifugal visual cells in medulla of the insect optic lobe. COLLETT, T. .. 239
Renshaw cell mediated inhibition of Renshaw cells: patterns of excitation and inhibition from impulses in motor axon collaterals. RYALL, R. W. 257
Static properties of cold receptors in nasal area of cats. HENSEL, H. AND R. D. WURSTER. .. 271
Transfer characteristics of excitation and inhibition in cat retinal ganglion cells. MAFFEI, L., L. CERVETTO, AND A. FIORENTINI. 276
Transfer characteristics of excitation and inhibition in the human visual system. FIORENTINI, A. AND L. MAFFEI. 285
Spinal neurons specifically excited by noxious or thermal stimuli: marginal zone of the dorsal horn. CHRISTENSEN, B. N. AND E. R. PERL. 293
Electrophysiological evidence for a mossy fiber input to the cerebellar cortex activated indirectly by collaterals of spinocerebellar pathways. BLOEDEL, J. R. AND J. E. BURTON. .. 308
Announcements 321

NO. 3. MAY 1970

Intracellular responses of the Müller (glial) cells of mudpuppy retina: their relation to b-wave of the electroretinogram. MILLER, R. F. AND J. E. DOWLING. 323

Response of retinal cells to moving spots: intracellular recording in *Necturus maculosus*. WERBLIN, F. S. 342

Response diversity of neurons in ventral cochlear nucleus of kangaroo rat to low-frequency tones. MOUSHEGIAN, G. AND A. L. RUPERT. 351

Interactions between voluntary and postural mechanisms of the human motor system. GOTTLIEB, G. L., G. C. AGARWAL, AND L. STARK. 365

Firing patterns of abducens neurons of alert monkeys in relationship to horizontal eye movement. FUCHS, A. F. AND E. S. LUSCHEI. 382

Oculomotor unit behavior in the monkey. ROBINSON, D. A. 393

Proximal negative response of frog retina. BURKHARDT, D. A. 405

Tonotopic organization and discharge characteristics of single neurons in nuclei of the lateral lemniscus of the cat. AITKIN, L. M., D. J. ANDERSON, AND J. F. BRUGGE. 421

Responses of neurons in the dorsal nucleus of the lateral lemniscus of cat to binaural tonal stimulation. BRUGGE, J. F., D. J. ANDERSON, AND L. M. AITKIN. 441

Corticofugal influence on activity of lateral geniculate neurons in the cat. KALIL, R. E. AND R. CHASE. 459

NO. 4. JULY 1970

Accommodation in afferent nerve terminals of snake muscle spindle. FUKAMI, Y. 475

Synaptic processing of taste-quality information in the nucleus tractus solitarius of the rat. DOETSCH, G. S. AND R. P. ERICKSON. 490

Response of trigeminal ganglion neurons to thermal stimulation of oral-facial regions. I. Steady-state response. POULOS, D. A. AND R. A. LENDE. 508

Response of trigeminal ganglion neurons to thermal stimulation of oral-facial regions. II. Temperature change response. POULOS, D. A. AND R. A. LENDE. 518

Discharge of cerebellar neurons related to two maintained postures and two prompt movements. I. Nuclear cell output. THACH, W. T. 527

Discharge of cerebellar neurons related to two maintained postures and two prompt movements. II. Purkinje cell output and input. THACH, W. T. 537

Operant controlled neural event: functional independence in behavioral coding by early and late components of visual cortical evoked response in cats. FOX, S. S. AND A. P. RUDELL. 548

Evoked sustained focal potentials and membrane potential of neurons and of unresponsive cells of the spinal cord. SOMJEN, G. G. 562

Announcements 583

NO. 5. SEPTEMBER 1970

Voltage threshold in excitable cells depends on stimulus form. BENNETT, M. V. L., B. HILLE, AND S. OBARA. 585

Cortical visual areas I and II in the hedgehog: relation between evoked potential maps and architectonic subdivisions. KAAS, J., W. C. HALL, AND I. T. DIAMOND. 595

Widespread cutaneous inhibition in dorsal column nuclei. JABBUR, S. J. AND N. R. BANNA. . 616

Receptive-field organization of the catfish retina: are at least two lateral mechanisms involved? NAKA, K.-I. AND P. W. NYE. 625

Partial activation of olfactory bulb: analysis of field potentials and topographical relation between bulb and lateral olfactory tract. SHEPHERD, G. M. AND L. B. HABERLY. 643

Sensitivity distribution and spatial summation within receptive-field center of retinal on-center ganglion cells and transfer function of the retina. CREUTZFELDT, O. D., B. SAKMANN, H. SCHEICH, AND A. KORN. 654

Firing of neuron pairs in cat association cortex during sleep and wakefulness. NODA, H. AND W. R. ADEY. 672

Depolarization of chemosensory nerve endings in carotid body of the cat. EYZAGUIRRE, C., I. M. LEITNER, K. NISHI, AND S. FIDONE. 685

XUM

Responses of cat cerebellar Purkinje cells to convergent inputs from cerebral cortex and peripheral sensory systems. FREEMAN, J. A. 697
Frequency analysis of stretch reflex and its main subsystems in triceps surae muscles of the cat. ROSENTHAL, N. P., T. A. MCKEAN, W. J. ROBERTS, AND C. A. TERZUOLO. 713
Distribution of neural responses to tilting within vestibular nuclei of the cat. PETERSON, B. W. 750
Neural correlates of gustatory intensity and quality. GANCHROW, J. R. AND R. P. ERICKSON. 768
An evaluation of length and force feedback to soleus muscles of decerebrate cats. HOUK, J. C., J. J. SINGER, AND M. R. GOLDMAN. 784
Localization of visual patterns by neurons in cerebral cortex of the cat. MANDL, G. 812
Somatic and visceral receptive field properties of fibers in ventral quadrant white matter of the cat spinal cord. FIELDS, H. L., L. D. PARTRIDGE, JR., AND D. L. WINTER. 827
Conditioned eye blink: gross potential activity at coronal-precruciate cortex of the cat. WOODY, C. D. 838
Conditioned eye blink: unit activity at coronal-precruciate cortex of the cat. WOODY, C. D., N. N. VASSILEVSKY, AND J. ENGEL, JR. 851
Electrophysiological properties and functional interconnections of two symmetrical neurosecretory clusters (bag cells) in abdominal ganglion of *Aplysia*. KUPFERMANN, I. AND E. R. KANDEL. 865
Stimulation of egg laying by extracts of neuroendocrine cells (bag cells) of abdominal ganglion of *Aplysia*. KUPFERMANN, I. 877
Antifibrillary effect of adrenergic fibers on denervated striated muscles. MENDEZ, J., L. C. ARANDA, AND J. V. LUCO. 882
Deformations and thickness variations accompanying spreading depression in the retina. DE OLIVEIRA CASTRO, G. AND H. MARTINS-FERREIRA. 891
